Release date: 01.08.2020. Manufacturer: Russian Federation TY 2313-036-20514586-2017

## FIRE-RETARDING COMPOSITION CONSTRUCTIONAL RAUM-PROFIE SKR

**CERTIFICATE** 

Certificate of Conformity № ССРП-RU.ПБ34.H.00438 from 23.12.2019.

**DESCRIPTION** 

Fire-retarding composition constructional RAUM-PROFIE SKR is a pigment suspension in binding material with thermo resistant and thermal insulation additives. Cured surface has low heat conductivity.

**FIELDS OF APPLICATION** 

The composition is designed to increase the fire resistance of steel structures and structures for industrial and civil purposes, including those operated indoors with non-aggressive or mildly aggressive environments. Primers such as  $\Gamma\Phi$ -021 ( $\Gamma$ OCT 25129-82 or TV 2312-008-20514586-04), primer Eppex TV 2312-032-20514586-2015 materials should be used to form anticorrosion coating for good adhesion to metal. Polytex TV 2312-024-20514586-2013 materials are recommended to use as finishing coating. Fire -resistance time is 90 min.

TECHNICAL DATA

**Colour** White, tone is not specified

Mass fraction of dry residue, no less 70±2%

Dry volume residue 60±2%

**Density** 1,30±0,05 g/cm<sup>3</sup>

Open time to grade 3 at (20+2)°C, no more 24 h

One layer thickness, no more 300-1500 microns wet layer

**INSTRUCTION FOR USE** 

Before applying the enamel rust must be removed from the metal surface by any available method (metal brushes, sandpaper or sandblasting). Then the surface is degreased with organic solvents and dried at a temperature close to  $20^{\circ}$  C for 2-3 hours. The metal is coated with an anticorrosive primer  $\Gamma\Phi$ -021 with a dry layer thickness of at least 50 microns, drying the primer layer at a temperature of  $20^{\circ}$  C and a humidity of no more than 80%. After drying, flame retardant is applied layer-by-layer with inter-coat drying for 24 hours.

CONDITIONS

The flame retardant coating should be used at an ambient temperature of  $-10^{\circ}$ C to  $+25^{\circ}$ C. The surface temperature should be at least 3  $^{\circ}$ C above the dew point to avoid condensation.

APPLICATION

Preparing Mix before use. The viscosity may increase when stored for a long time. It is allowed to

be thinned up to 3% with a formula thinner RP1K to achieve the working viscosity

when applied by airless spraying with high-pressure devices.

Air-free spraying Nozzle diameter: 0,027"-0,030"

Initial pressure: 180-200 atm

Brush Use for small areas

Roller Use for small areas

Thinner RP-1K

Cleaner RP-1K, xylene, toluene

Cleaning Wash the tools after using immediately. The frequency of washing depends on the

**8** (4932)773-503

amount of sprayed material, the temperature and the time since the shutdown, including any time lag.

**PACKAGE SIZE** 

Metal euro bucket 21 l: basis 23 kg

**STORAGE** 

Store in a tightly closed container in a dry room, away from sources of ignition, protecting from direct sunlight and moisture.

**GUARANTED STORAGE LIFE** 

Expire date is 12 months in case if delivery and storing rules are followed. After expire date shouldn't be used without tests.

**HEALTH AND SAFETY** 

Observe precautionary measures. Use means of individual protection (respirators, gloves, glasses, etc.). Use under well ventilated conditions. Use in places without sources of open fire and ignition only. Avoid skin or eyes contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water, don't use solvents. If eyes contact, rinse with clean water for at least 10 minutes, consult a doctor. In case of ingestion consult a doctor.

**RECYCLING** 

When overflowing, cover up with sand and recycle as consumer waste. Packing materials are recycled as consumer waste.

Further Information.

The recommendations above are based on our own research and our best knowledge but don't fully guarantee any particular case as it depends on the quality, friability and porosity of the base. The local working conditions and methods may vary and are beyond our control. Therefore we cannot be held responsible for the actual work on the site. The information is currently updating.
