На рынке с 2002 года

## ООО «Полимер Экспорт» ПРОМЫШЛЕННЫЕ ЛАКОКРАСОЧНЫЕ ПОКРЫТИЯ 2 8 (4932)773-503 гаиm-profie.ru inmarketing@gk-rp.ru

The product is two components. Component A is a dispersion of pigments and anticorrosion filler in epoxy resin. Component B is a hardener solution. Mix the contents of the containers in the supplied proportions. After mixing, use within the specified pot life.

<u>Mixing sequence:</u> The basis (component A) is mixed with a construction mixer. Then mixed hardener (component B) is added to the basis (component A) and thoroughly mixed with a construction mixer. **Attention!** Careless mixing or incorrect ratio can lead to uneven curing and painting film properties weakening.

| Proportions       | 100:3,5 by weight<br>8:1 by volume   |
|-------------------|--|
| Pot life          | 20°C - 4 hours   |
| Air-free spraying | Thinning: 0-10% by volume<br>Nozzle diameter: 0,015"-0,021"<br>Initial pressure: 120-200 atm   |
| Air spraying      | Thinning: 5-10%<br>Nozzle diameter: 2,2-2,5 mm<br>Pressure: 3,5-4 atm  |
| Cross linking     | No less than (Dry layer thickness 80 microns) at 20ºC  |
| Brush, roller     | Can be recommended for small and hard-to-reach areas. Thin the primer depending on the working conditions when using brush.                                  |
| Thinner           | Formula thinner EPPEX  |
| Cleaner           | Acetone, P4, P5  |
| Finishing         | Tubing, pistol and other spraying tools must be cleaned after using  |
| Cleaning          | Wash the tools after using immediately. The frequency of washing depends on the amount of sprayed material, the temperature and the time since the shutdown, |

**DRYING TIME** Surface temperature +5°C +10°C +30°C +20°C Degree 1 (GOST 19007) 1 h 40 min 15 min 10 min Degree 3 (GOST 19007) 2 h 1 h 40 m 1 h 35 min Minimum recoating 2 h 1 h 40 m 1 h 35 min interval 20 d 14 d 7 d Start of operation 7 d Minimum recoating interval: the minimum recommended time the next coat to be applied. Start of operation: the minimum time the coating to be exposed to a given environment. These data should be considered only as indicative for a wet film thickness of 100 microns. PACKAGE SIZE Metal euro bucket 21 l: basis 23 kg Metal bottle 1 I: hardener 0,8 kg STORAGE Store due to the GOST 9980.5 -2009 closed in closed store premises with ambient temperature from -40 to + 40°C.

including any time lag.

## GUARANTED STORAGE LIFE

EPPEX Zn primer guaranteed shelf life is 6 months, EPPEX ST hardener is 24 months from the date of manufacture, subject to the consumer's compliance with the rules of transportation and storage. After expire date shouldn't be used without tests.

### HEALTH AND SAFETY

When painting work, use personal protective equipment (respirators, gloves, glasses, etc.). Work inside the room should be carried out with artificial (local, general) or natural ventilation. Use the primer only in places without sources of open fire and ignition. Avoid contact with skin or eyes. In case of skin contact immediately wipe with a rag or cotton swab, rinse thoroughly with soapy water, do not use solvents. In case of eyes contact rinse with clean water for at least 10 minutes, consult a doctor. In case of ingestion, consult a doctor.

#### RECYCLING

Packing materials are recycled as consumer waste.

#### Further Information.

The recommendations above are based on our own research and our best knowledge but don't fully guarantee any particular case as it depends on the quality, friability and porosity of the base. The local working conditions and methods may vary and are beyond our control. Therefore we cannot be held responsible for the actual work on the site. The information is currently updating.
